Kevin,
Thank you and everyone on your end for being on the call yesterday. It was a good call.

As requested I am also confirming that the placement of CCR in a landfill with a bottom liner is not considered encapsulated beneficial use o CCR under the federal CCR Rule.

Steve

Subject: Follow up regarding conference call

Steve,

Thanks for setting up the conference call today and for the guidance provided. When the follow-up inspection is complete for AES, I will forward you a copy of the documentation. If there is any more information you need, please don't hesitate to ask.

In summarizing the call regarding PVT, I realize that a satisfactory beneficial use determination has not been provided, and that proper justification is needed to make a determination. However, I would like to document the fact that the placement of CCR in a landfill with a bottom liner is not an considered an encapsulated use . Would it be possible for you to confirm this? A yes or no reply to this email would be suffice. Thanks!
